FOR IMMEDIATE RELEASE

OTIS TECHNOLOGY MEETS THE DEMAND OF THE MILITARY
In creating the Small Arms Armorer's Tool Case

The environmental conditions of the battlefield today are much different than in past conflicts. The extreme mixture of sun, wind, and sand are challenging the way weapons maintenance has been traditionally handled. Together, with our partners from all branches of the U.S. military, OTIS Technology has developed a comprehensive solution: **The Small Arms Armorer's Tool Case.**

Brad McIntyre, Military Sales for Otis states that, "The Weapons Technician at Fort Drum, New York, came to Otis because there was not a complete Armorer's Tool Case available. They were looking for one that could service all of their small arms. He knew that Otis could meet the challenge and expectations of the Soldier because of our expertise in Weapons maintenance."

McIntyre worked in conjunction with Fort Drum to formulate a complete **Small Arms Armorer's Tool Case.** A few of the weapons that the Otis Tool Case is now properly servicing are; the M4, M16, M240B, M249SAW, and MK19. The Case is readily available to service each and every small arm that the Military uses.

The **Small Arms Armorer's Tool Case** includes: Armorer's Tools, e.g., Roll Pin Punches, Hammers, and Twisting Pliers, along with the Otis Quick Detach Armorer's Tool Bag and the Otis Deluxe Military Elite. The Otis Military Elite alone was made with the Armorer in mind. These tools and products are all that are necessary to clean and maintain every small arms weapon system.

It was 2006 when Otis first started working on this project. It was over a year in the making, and their dedication has proven successful.

Otis Technology is pleased and committed to make contributions for the protection of our Military. Otis Technology, located in Lyons Falls, New York is the industry leader in weapons-cleaning innovation.
